PROJECTS

Boba Business Management
- A business management platform allowing users to manage products, stock, orders, emails, and user reviews. Includes a dual-role system for seamless switching between shopper and admin experiences.
- Built through team coordination, organized daily stand-ups and a shared ticketing system, fostering our own Agile environment. Afterwards, I independently overhauled the code & UI/UX for a live demo.
- **React, TypeScript, Node.js, Express.js, SQLite3, Jest, Auth0**

Read more and see demo

Ticketer
- A visual work management tool leveraging a Kanban board system for project organization. Features include board, list, and ticket customization with support for guest and authenticated users.
- Built independently using unfamiliar technologies to learn new frameworks/languages, enhance scalability and deepen containerization knowledge.
- **Angular, TypeScript, C# .NET, Azure, Docker, MySQL, Auth0**

Bargain Alert (In-Development)
- Approved to access TradeMe's official APIs, Bargain Alert is an app for delivering personalized notifications on TradeMe listings using advanced parameters not available on their platform.
- I am building this app to advance my knowledge on scalable cloud solutions and real-time notifications, with a focus on elevating user engagement and client interaction to greater heights.
- **React, TypeScript, C# .NET, Azure, Docker, PostgreSQL, SendGrid, Auth0**

TECHNICAL SKILLS

- JavaScript & TypeScript
- React & Angular
- Jest & Vite unit testing
- RESTful APIs
- Node.js, Redux.js
- C#
- .NET
- Azure
- Docker
- MySQL & SQLite

PROFESSIONAL EXPERIENCE

Dev Academy

Auckland
March 2023 – July 2023

Software Developer Apprentice

- Completed over 100 hours of pair programming with 15+ developers, fostering collaboration and problem-solving skills.
- Delivered a polished e-commerce app demo to a non-technical audience of 50+ clients.
- Facilitated communication across 8 full-stack React projects using daily stand-ups and retrospectives, ensuring alignment and progress.
- Excelled in a rigorous 60-hour/week, 5-month programme, earning recognition from the lead lecturer as a top student of my cohort.

PowerShield Electronics

Auckland
Sep 2022 – Dec 2022

ERSA Soldering Machine Technician

- Programmed and fine-tuned selective soldering parameters, leveraging precision and attention to detail to ensure efficient and reliable automated workflows.
- Diagnosed and resolved machine issues by analyzing system logs and troubleshooting production inconsistencies.

EDUCATION

Dev Academy
Auckland
March 2023 – July 2023

NZ Certificate in Applied Software Development

University of Auckland
Auckland
Feb 2019 – Nov 2019

Bachelor of Science in Computer Science (One year completed with 8.2 GPA)

INTERESTS

- Building impactful, user-focused web apps
- Exploring cutting-edge frameworks and performance tools
- Writing development blogs to reflect on challenges and growth
